CONCEPT NOTE

BACKGROUND

2024 will be a key year for the Paris Agreement, as another piece of the system will enter into full force: the **Enhanced Transparency Framework (ETF)**. The ETF is a central component to the design, credibility, and operation of the Paris Agreement. According to the modalities, procedures and guidelines (MPGs) of the ETF, Parties to the Paris Agreement shall submit their first Biennial Transparency Reports (BTR) by 31 December 2024. Many countries have already started preparing their first BTR, however they are facing a variety of challenges, potentially hindering a timely submission. Yet, a timely submission of BTRs is key for the successful and long-term implementation of the Paris Agreement. It is needed to set up the regular cycle of reporting and review which is essential for creating trust and accountability among Parties. The reports will additionally serve as a key input for the NDC Updating Cycle in 2025 as well as the second Global Stocktake that will take place in 2026-2028.

OBJECTIVE

Against this background, the Partnership on Transparency in the Paris Agreement (PATPA) will host a Global Dialogue on BTR preparation. The aim of this event is to provide developed and developing country Parties **with a space to discuss the progress in developing their first BTR and exchange on common technical challenges**. It will serve to **create momentum** and support Parties in the last mile of their BTR preparation.

OUTCOME

The proposed outcome of the dialogue is for participating countries to have defined priority actions on how to overcome challenges for a timely BTR submission. Additionally, the Dialogue will deliver a summary of lessons learned for a general technical public.

TARGET GROUP

BTR coordinators from around 35 developed and developing countries.

FORMAT

The exchange combines inputs by experts and interactive elements during **4 working days**, within a **safe and confidential space**. The working language of the Dialogue will be **English**.

INTRODUCING THE PEOPLE PROVIDING INPUTS

EMILIE BEAUCHAMP INTERNATIONAL INSTITUTE FOR SUSTAINABLE DEVELOPMENT (IISD)

Emilie is the lead on monitoring, evaluation, and learning (MEL) with IISD's Resilience program for the past two years. She works closely with the NAP Global Network and other IISD on designing and implementing MEL systems for climate change adaptation. She is also the co-chair of the Methodological Advisory Group of the Race to Resilience where she is working to enhance approaches and methods for assessing and tracking resilience. Previously, she has been working on Evaluation at IIED. She has a PhD in Natural Resources and Conservation.

LENA DOVIDAT THE GREENWERK.

Lena is advisor for climate finance at the greenwerk. with a focus on climate finance tracking and transparency. For the Initiative for Climate Action Transparency (ICAT), she has developed a guide and tools that support developing countries in improving transparency on their climate finance needs and existing flows. She is also supporting the German government in evaluating their climate finance and contributed to developing a Green Finance Taxonomy in Bhutan. Lena holds a postgraduate degree in climate studies.

CYNTHIA ELLIOTT WORLD RESOURCES INSTITUTE (WRI)

Cynthia is a Senior Climate Policy Associate for the Global Climate Program at the World Resources Institute. She co-manages WRI's research and capacity building efforts to advance national long-term climate change planning to accelerate near-term climate action and enhance accountability and transparency. Previously, Cynthia conducted research on international climate governance arrangements for non-state and subnational actors and reporting and tracking progress under the United Nations Framework Convention on Climate Change. She did her postgraduate in Global Environmental Policy.

RICARDO FERNANDEZ EUROPEAN ENVIRONMENT AGENCY

Ricardo has over two decades of experience at the European Environment Agency, compiling and reviewing a variety of GHG inventories and MRV and transparency activities of the UNFCCC and the Paris Agreement over the years. He participates in international climate negotiations and furthers the field of climate action through various publications. His technical background is in Business Economics and Applied Statistics.

MATEJ GASPERIC GREENHOUSE GAS MANAGEMENT INSTITUTE (GHGMI)

Matej is the Mitigation Program Director at GHGMI. In his role, he leads strategic planning and program management efforts and technical support aimed at reducing greenhouse gas emissions and provides technical support the Caribbean Cooperative Measurement, Reporting and Verification Hub (MRV Hub). Prior to joining GHGMI, Matej was head of department and advisor to the Government of the Republic of Slovenia and an independent consultant. Among others, he was responsible for the establishment of a national MRV system for greenhouse gases/air pollutants and the preparation and implementation of emission trading in Slovenia and revision of the carbon taxation scheme. As UNFCCC reviewer for greenhouse gas inventories of Annex I countries and lead reviewer for national communications and biennial update reports, Matej is actively involved in the annual UNFCCC inventory review process. His technical background is in mechanical engineering with a focus on energy and processes.

JIGME UNFCCC SECRETARIAT

Jigme leads a professional team in the UNFCCC secretariat that supports Parties to the UNFCCC to prepare, submit and implement their nationally appropriate mitigation actions, Nationally Determined Contributions, and long-term low GHG emissions development strategies, and that provides technical assistance on the existing MRV arrangements. He also leads the support to the intergovernmental negotiations on issues relating to provision of financial and technical support to developing country Parties for MRV, and development of modalities, procedures and guidelines for the transparency framework under the Paris Agreement. Prior to joining the secretariat, Jigme was working for the Royal Government of Bhutan as a technical focal point for climate change and air quality. By profession, he is a meteorologist.

LORENZ MOOSMANN ÖKO-INSITUT E.V.

Lorenz is an expert for greenhouse gas inventories and projections. He has participated in the UNFCCC negotiations in the area of transparency since 2017. Lorenz is working as a senior researcher at Öko-Institut since 2018. He is an environmental scientist by training.

VLAD TRUSCA UNFCCC SECRETARIAT

Vlad is the manager of information hub, data and tools in the Transparency Division of the UNFCCC secretariat. The Transparency Division supports intergovernmental processes related to MRV and the ETF, including by providing technical assistance to developing country Parties, training to experts engaged in reporting and review processes and also an information hub, reports and tools. Prior to joining the secretariat, Vlad was senior advisor and director at the climate change department of the Ministry of Environment of Romania. His technical training is in environmental economics and management.

CRISTINA URRUTIA ÖKO-INSTITUT E.V.

Cristina Urrutia has been at Öko-Institut since 2019. Before that she worked for the Ministry of Environment of Peru and for the Ministry of Environment - of Germany, actively participating in the UNFCCC process until 2018. She is a biologist by training.
